

Mini Human Biologist

- For Ages 7-8 (P2-P3) (G2-G3) (Y3-Y4)
- Monday to Friday
(A full course consists of 10 lessons)
- 1.5 hours per lesson

How do lungs give us fresh air? How can I tell the difference between an itch and a pinch? How does blood carry nutrients throughout our body? Led by our industry experts, students will explore the intricacies of the human body through fun and interactive experiments and model human organs that our biology specialists will build together with students. Through scientific methods, students will gain a practical appreciation for the incredible result of natural evolution.

Theory

- Respiratory system
- Nervous system
- Cardiovascular system

Skills

- Teamwork
- Practical experiments
- Critical thinking
